SUMMARY

Computer Science graduate (B.E., 2023 - 2026) integrating **AI/ML models** (Hugging Face, Gemini) into Python systems, building **REST APIs**, **microservices**, and **data pipelines** with experienced engineering teams.

SKILLS

- **Languages:** Python, SQL, HTML, CSS, JavaScript
- **AI/ML:** Hugging Face, LLM Prompting, OpenCV, Model Integration
- **Data:** Pandas, NumPy
- **Backend:** FastAPI, Django, REST APIs, API Design
- **Databases:** PostgreSQL, MySQL, Redis
- **Cloud & Tools:** AWS, Docker, Git, Jira, Scrum, SDLC
- **Core CS:** Data Structures, Algorithms, OOP, Debugging
- **Systems:** Microservices, Distributed Systems, Asynchronous Processing, Automation Scripting

EXPERIENCE

Software Development Engineer Intern *Apr 2026 - Present*
MyBizz ERP Global Enterprise Solutions

- Split a monolithic Django app into **microservices** on **Celery**/**Redis** under guidance, cutting latency 8s to 2s.
- Automated user cleanup and notifications with **cron jobs**, eliminating a previously manual maintenance task.
- Cut cross-service debugging time 50%+ using AI tools (**Kiro CLI**) within **Jira** sprints.
- Reviewed **pull requests**, wrote **unit tests**, and documented backend modules for team onboarding.

Software Engineer Intern *Dec 2025 - Feb 2026*
AdeptSK Solutions Pvt. Ltd.

- Built a **FastAPI** backend embedding speech-to-text and adaptive **ML models** into the platform.
- Implemented **data caching** to eliminate redundant reprocessing, improving response speed for repeat queries.
- Shipped real-time, personalized learning recommendations reaching 5,000+ students in production.
- Tracked sprint commitments in **Jira**/**Scrum**, documenting API changes to keep the team aligned.

PROJECTS

DeepDetect - AI-Powered Deepfake Detection github.com/vendotha/DeepDetect
Django, Hugging Face, Google Gemini, OpenCV, Pandas, NumPy

- Built a **Django** + HTML, CSS, JS web app using a Hugging Face **classification model** to detect deepfakes.
- Integrated **Gemini** Flash to turn each verdict into a plain-language explanation.
- Processed JPG/PNG/MP4 uploads via **OpenCV**, aggregating frame scores with **Pandas**/**NumPy** per video.

Mealzo - AI-Powered Food Delivery Platform github.com/vendotha/Mealzo
Django, Stripe API, Google Maps API, SQLite, Bootstrap, JavaScript

- Built a **Django** food delivery platform with 3 role-based dashboards, supporting 15+ core user flows end-to-end.
- Integrated **Stripe**/UPI payments and OTP auth via 2Factor, cutting checkout failures by 30%+ in testing.
- Enabled real-time order tracking with the **Google Maps API**, reducing location-update latency to under 2s.

CERTIFICATIONS

- Programming Essentials in Python - **Cisco Networking Academy** (Jan 2024)
- Machine Learning Foundations and Cloud Foundations - **AWS Academy**
- AI Fluency: Framework & Foundations - **Anthropic**
- Scrum Fundamentals Certified (SFC) - SCRUMstudy

EDUCATION

B.E. in Computer Science *2023 - 2026*
MVSR Engineering College, Hyderabad **CGPA: 8.39 / 10**
Diploma in Computer Engineering *2020 - 2023*
TRR College of Technology, Hyderabad **CGPA: 8.58 / 10**
